

# catchmee™

World Leader in Mobile Monitoring

## What is catchmee?

Catchmee is a software package that you can install on mobile phones, but not on a SIM card. After installation, catchmee records all of the data from your internet-ready mobile phone in the background and sends the data via a data channel to your personal myCatchmee account on our catchmee server. You can log into [www.mycatchmee.com](http://www.mycatchmee.com) with your login data and check the communications that have been going across your mobile at any time. Catchmee Ultimate even lets you listen in on surrounding sounds from a certain mobile phone that you can define during installation. Catchmee creates an invisible connection to the target phone, and you can listen to the mobile and its surroundings live as it happens. Apart from that, catchmee sends you an SMS with the new phone number any time a new SIM card is inserted into the target phone.

## Application Features

**Remote Listening** Remote Listening lets you make a hidden call to the phone that has catchmee installed on it, so you can listen to the sounds around the phone in real time.

**Remote Control Phone** Send a secret SMS to the catchmee phone and control all of its configuration settings and functions. You can also remote control the phone directly from the server – no hands-on alterations to the phone necessary.

**SMS and Email Logging** This function sends a copy of all of your text messages and e-mails on the catchmee phone to your myCatchmee web account. The name to the phone number will be shown for any numbers already stored in the phone book on the catchmee phone.

**Call History Logging** This function sends the time, phone number and duration of any incoming and outgoing calls to your central myCatchmee web account. The name to the phone number will be shown for any numbers already stored in the phone book on the catchmee phone.

**Location Tracking** Find the current location of the catchmee phone using CELLID and CELL name.

**Call Interception** Call interception patches you in on a call on the catchmee phone for you to listen into in real time.

**GPS Tracking** Show the location of a mobile phone with a GPS module in real time on a virtual world map in your central myCatchmee web account. You can also track the route travelled by the catchmee phone.

**Phone Book Backup & Restore** Make a backup of the catchmee phone's phone book and view it in your myCatchmee web account. You can also export the data into a file to recover any data you have lost.

**SMS and eMail Backup** This function shows you all of the incoming and outgoing text messages and e-mails on the catchmee phone in your myCatchmee web account. You can easily export the data into a file.

**SIM Change Notification** This function automatically sends the designated mobile phone number a text message with the new phone number of a catchmee phone after the SIM card has been changed. This will show you the phone number and SIM data of a thief if your phone has been stolen.

**Stealth Mode** Catchmee Software works completely invisibly in Stealth Mode on the catchmee phone.

**Turned Off Listening** Turned-off listening lets you listen in on surrounding sounds – such as conversations – taking place around the phone, even with the phone switched off.

## Web Support

**Secure login** Your personal myCatchmee web account is protected by state-of-the-art SSL encryption and a password.

**View Report** Log onto your myCatchmee web account and view all of the text messages, e-mails, incoming and outgoing phone calls, locations, and much more in a simple, intuitive interface.

**Advanced Searches** This function makes it easy for you to view certain text messages, e-mails, names, phone numbers and much more.

**Download Report** Generate a report in PDF, CSV or RTF format and download it to your computer for analysis or backup.

**GPRS Capability Required** All catchmee needs is a GPRS connection.

### \* Legal note on certain catchmee functions:

Our software is designed to monitor the connection data of any mobile phone, that you own or use yourself or have proper consent to monitor. You must notify users of the phone, where catchmee™ is installed on, that they are being monitored. Failure to do so may result in the breach of federal and/or state laws. It is the responsibility of the licensed user of catchmee™ alone to, verify and obey, all applicable laws in the applicable jurisdiction in regards to the use of catchmee™. If you are in doubt, consult your local attorney before using catchmee™. Silent Bridge, Inc. assumes no liability and is not responsible for any misuse or damage caused by catchmee™. By purchasing, downloading, installing & using catchmee™, you hereby agree to the above and have read and accept the License Agreements and all Amendments and Attachments thereto.
